

Esta novela narra la historia de un estudiante de ultimo curso de ciencias fisicas en la Universidad de Granada que por circunstancias se encuentra con un estudio del MIT (Massachusetts Institut Technology) que plantea una novedosa tecnologia capaz de generar energia muy barata aprovechando la ropa para el ejercicio fisico de las personas, pero tiene dudas de la autenticidad de la misma. La Trama se va complicando con los intereses cruzados del Presidente de una de las principales companias electricas del Pais, con el mundo de la politica y con las mafias del narcotrafico. Una aventura que va desde Granada a Madrid pasando por Turku (Finlandia), Paris (Francia) o Cali (Colombia). Todo mezclado con las principales pasiones que mueven al hombre, el amor, la ambicion, la amistad, la avaricia, etc.. Una apasionante novela que le enganchara desde el primer capitulo y en la que usted se podra identificar e incluso llegara a poner cara a alguno de los personajes de la misma.
