

New Saucerian is delighted to present Albert K. Bender's Space Review, a collection of volumes from Bender's quarterly magazine of the same name. Bender was the founder of the first major UFO club in the world, the International Flying Saucer Bureau (IFSB), founded in 1952. Even though the bureau was a great success, it was mysteriously closed down the following year. This rare anthology was originally published in conjunction with Bender's first book, Flying Saucers and the Three Men, which was beset by various "jinxes," Men in Black attacks, missing manuscripts, psychic disturbances, and other unusual delays. Until now, these issues of Space Review were only available to members. For the first time ever, they are being made available for the general public to enjoy. Inside, one finds interesting details that may lead to some understanding of what exactly happened to Bender, who became a media star after announcing he had been taken to a "bisexual" planet, Kazik. According to Bender, the denizens of Kazik had not only surrounded Earth with an array of orbiting spacecraft, but had also buried "motherships" in remote regions like Antarctica, in an effort to extract a key substance from our seawater. Bender's colorful descriptions of the people of Kazik, having received wide attention in the early days of ufology, influenced a generation of saucer enthusiasts, who put the stories into mass circulation. As a result, many elements of Bender's fantastical tale can still be found today, in programs like Futurama, The Matrix, X-Files, and countless others. "Perhaps the single biggest influence on saucer lore, ever!" "John A. Keel

Motor Control: Issue 1, 2000, Hopes for Great Happenings (Routledge Revivals): Alternatives in Education and Theatre, Foreign Relations of the United States, 1977-1980, Volume VIII, Arab-Israeli Dispute, January 1977-August 1978, The Faces of Impressionism: Portraits from American Collections, Esenciales del nuevo Nacimiento (Spanish Edition),

The Space Review is an online publication whose focus is on publishing . The Space Review is a free online publication, published weekly with in-depth articles, essays, commentary and reviews on space exploration and development . In The Space Review's write up of the space portions of the Pentagon's just- released annual report on Chinese military power, author Dwayne Day notes that . 2 hours ago Artist's illustrations of Boeing's CST Starliner (left) and SpaceX's Crew Dragon capsules in orbit. NASA Administrator Jim Bridenstine himself ordered the upcoming safety review of SpaceX and Boeing, which was reportedly prompted by Elon Musk's behavior on comedian Joe. As an international key journal on scientific space research, its purpose is to provide a comprehensive synthesis of the various branches of space research. Netflix puts its money where its mouth is with an expensive-looking Lost in Space that's also refreshingly above average. . This week in The Space Review. It's not (just) about the starship. A year project to develop the technology needed for a crewed interstellar spacecraft is a .
